concrete

INDEX Volume 2 1968

Figures in **bold** represent the issue number, which is followed by the relevant page number

Pagination. The sequence of pages in this volume does not include the following numbers: 179, 346, 347, 388-391, 432-435, 476-479, 530-533. It includes the additional pages N1-N4 following pages **2**:94, following **3**:132 and following **4**:178

Abbey House, Farnborough **12**:505
Admixtures for concrete **1**:39
Admixtures, data on **1**:45
Admixtures, what should an engineer know about the nature of? **7**:272
Aggregates, production of low-density **5**:183
Aluminium and cement, process for making **7**:307
American Concrete Institute's headquarters at Detroit, Michigan **8**:317
Apex Tower, Colliers Wood **12**:497
Assessing foundation settlement by computer **9**:387
Autoclaved aerated concrete, manufacture of **5**:183
Barbados, Hilton hotel **7**:287
Battery-cast cladding panels **6**:238
Bentonite, slurries uses of **3**:121
Berry Wiggin, Offices at Hoo, Rochester, Kent **12**:498
Bootham school, York, assembly hall **12**:504
Bridge abutments constructed by thrust boring **6**:247
Bridging the gap between the disciplines or architecture and engineering **4**:152
Brielsche Maas bridge in Holland **11**:453
Camus factory at Brimsdown, Middlesex **7**:294
Cast-in-situ construction: symposium **6**:261
Cement and Concrete Association's annual report **9**:387
Cement, process for making aluminium and **7**:307
Cambridge: The University Centre **12**:509
Cement with high early strength **11**:475
Churchill College, Cambridge **10**:413
CIRIA—the construction industry's organization for research and information **3**:112
Concrete blockwork, data sheets on **9**:387
Concrete Research **7**:278
Concrete research at the Building Research Station **3**:123
Concrete roads **3**:138
Concrete roads: Papers presented at a symposium **2**:91
Concrete roofing tiles, a plant for the manufacture of **8**:323
Concrete Society's 1968 award **12**:492
Concrete surfaces **6**:263
Concretor, the **2**:93
Control of deflections in the new unified code: BRS symposium **12**:511
Cost of structural frames **1**:48
Cumbernauld town centre: the structure of phase 1 **12**:495
Cylinder splitting test **2**:77, **11**:456
Dam, South Africa's largest arch **4**:167
Design of long prestressed parabolic shells **4**:161
Design programme for r c columns **7**:293
Detailing of reinforced concrete **8**:308, **8**:332, **11**:449
Distribution of concrete **7**:290
Double-tee beams of 120 ft. span, precast **6**:259, **11**:463, **12**:502
Durability, a note on **8**:325
Durability of concrete **7**:282
East Anglia University: Student residences **12**:500
Edinburgh University Library **10**:416, **12**:507
Emmanuel House and Rochester Row Car Park **12**:510
End-blocks for post-tensioned cables, design for **3**:134
Federation Internationale de la Precontrainte (FIP) Symposia in Madrid **8**:328
Fibrous reinforcement for concrete **11**:451
Fire resistance of concrete structures **4**:176
Footbridge at Southampton **7**:279
Formulae for transverse moments and thrusts in long inner cylindrical shells **4**:177
Formwork: A philosophy of **3**:137
Foundation design, influence of structural rigidity ratio on **6**:234
Fresh concrete, rapid analysis of **4**:140, **5**:206
Fulmer Grange training centre **12**:503
Gas Council research station, Killingworth **12**:501
Georgia's sports hall, University of **6**:233
Greyfriars Bridge, Hereford **1**:20
Guniting of cooling towers at Thorpe Marsh power station, structural **3**:135
Harrow Road Flyover, Paddington, London **1**:19
Hayward Gallery on the South Bank **8**:313, **12**:496

High-quality concrete mixes, rational design of **5**:212
correspondence and errata **7**:285
Hockley flyover, construction of **10**:405
Horizontally-curved members : an approximate method of design **10**:418
Information for the construction industry **9**:387
Keeping the mixer-turning : A discussion on the production of concrete **5**:211
Kingston bridge and its approaches, Glasgow **11**:441
Lambot's boats **6**:241
Launching a prestressed concrete bridge **10**:401
Lennig House, Croydon **12**:508
Lightweight aggregate of expanded glass—mineral composition **9**:356
Lightweight concrete congress—Looking back on ICLC **9**:355
Lightweight concrete review **5**:183
Lightweight concrete : some practical factors **6**:246
Lightweight concrete : an application to foundation construction **5**:223
Limit state design, application of **4**:147
Limit-state design and development-length bond stress **9**:364
Limit state design : its practical effects **5**:200, **6**:248
Limit, state design, why ? **3**:103
Liverpool cathedral **12**:506
London Airport, St. George's Chapel **11**:467
Long Bennington by-pass **8**:315
Madrid symposia on prestressed concrete **8**:328
Major re-development in Paris **7**:280
Mancunian Way **12**:493
Mersey Tunnel Approaches **1**:47
Metric sizes for reinforcing bars **8**:326
Metric— changing to **6**:243
Correspondence **8**:322
Mix design simplified **2**:77
Mobile concrete plant of high output **12**:484
Mobile small line concrete pumps **9**:380
Model techniques for prestressed concrete pressure vessels **11**:475
Movement at joints in buildings **6**:245
New York congress of structural engineering **10**:397
New structures in concrete **1**:3, **3**:N.3
Buildings **1**:5, **2**:61, **3**:129
Bridges and roads **1**:18
Water retaining structures **1**:27
Industrial structures **1**:32
Non-bonded prestressing tendons **11**:451
Non-destructive testing of concrete **8**:316
Obituary : Archibald Kirkwood Dodds **4**:154
Open days at the Building Research Station **11**:450
Paris : major re-development in **7**:280
Pierced walls subject to gravity loads **6**:252
Polymer cements **1**:46
Pongolapoort dam **4**:167
Precast double-tee beams of 120 ft. span **6**:259, **11**:463, **12**:502
Prestressing techniques **4**:177
Prestressing, tendons, recent developments in **2**:77
Process for making aluminium and cement **7**:307
Production of concrete : A discussion **5**:211
Pumping concrete **2**:68
Pumps, review of small-line concrete **9**:380
Quality control for ready-mixed concrete **11**:436, **11**:455
Quantity surveyor's role **4**:173
Correspondence **7**:284
9:357
Queen Elizabeth Hall, Purcell Room and Hayward Gallery **8**:313
12:496
Railway bridges, developments in the construction of concrete **9**:373, **10**:426
Rapid analysis of fresh concrete **4**:140, **5**:206
Rapid construction of a large warehouse at Peterborough **12**:513
Rawcliffe bridge in the West Riding **6**:232
12:499
Ready-mixed concrete : quality control for **11**:455
Reinforced concrete : spacers for **5**:199
11:464
Research and its effectiveness **11**:452
Research at Imperial College **3**:109
Research at the Cement and Concrete Association **4**:158
Research : concrete **7**:278
Research on concrete at the Road Research Laboratory : facilities and programme **3**:115
Retexturing the carriageways of the M1 motorway **12**:527
RIBA awards, 1968 **10**:413
Correction **12**:519
Ring beams, circular slabs supported on **4**:169
Rochester Row Car Park and Emmanuel House **12**:510
Ronan Point : structural behaviour of **12**:488
St. George's Chapel, London Airport **11**:467
St. Paul's Cathedral Choir School **10**:415
Schmidt rebound hammer : using the **10**:402
Shells : design of long prestressed parabolic **4**:161
Skidding resistance of concrete motorways **2**:93, **12**:527
Slabs : reinforcement of, in accordance with a pre-determined field of moments **2**:69
Correspondence **8**:319
Slabs, Strip method : a new approach to the design of **9**:358, **12**:519
Slabs : circular, supported on concentric ring beams **4**:169
Slip-forming concrete pavements : British system for **9**:352
Small-line concrete pumps : review of **9**:380
Some new concrete buildings abroad **2**:61, **3**:129
South Africa's largest arch dam **4**:167
Spacers for reinforced concrete **5**:199, **11**:464
Steel reinforcement and tendons for structural concrete **7**:295, **8**:333
Stock Exchange in London : Constructing the new **3**:102
Stockton-on-Tees : Factory **12**:502
Strip method : a new approach to the design of slabs **9**:358
Corrections **12**:519
Structural behaviour of Ronan Point **12**:488
Structural rigidity ratio : its influence on foundation design **6**:234
Tail piece **11**:475
Tendons for structural concrete : and steel reinforcement **7**:295, **8**:333
Thin specimens of concrete : preparation of **3**:133
Thorpe Marsh power station : Structural guniting of cooling towers at **3**:135
Tolerances in precast concrete construction **5**:199
Torsional rigidity of concrete bridge decks **11**:468
Tower of London : new Jewel House **1**:17
Tower-shaped shells **9**:387
Training civil engineering technicians **8**:318
Training grants in 1968-9 **9**:387
Tyne Tunnel **1**:47
Ultimate torsional resistance of rectangular reinforced concrete beams **12**:522
Unified Code, control of deflections in the new : BRS symposium **12**:511
Warehouse at Peterborough : rapid construction of a large **12**:513
Western Avenue extension **1**:20, **4**:155
Winter concreting **2**:68, **4**:175
Woolsington Airport, Newcastle-upon-Tyne **10**:416
1969 World Congress on Precast Concrete **9**:387
